

BetaShares Australian Equities Strong Bear Hedge Fund Annual Hedge Fund Report

as at 31 December 2019

Fund's investment objective:	To help investors profit from, or protect against, a declining Australian share market by seeking to generate magnified returns that are negatively correlated to the returns of the Australian share market (as measured by the S&P/ASX 200 index).	
The Fund's actual asset allocation:	Cash equivalent investments: 100% Exchange traded derivatives (short ASX SPI 200 futures exposure): -224.37%	
The liquidity profile of the Fund's assets: (The estimated time required to sell an asset at the value ascribed to that asset in the Fund's most recently calculated net asset value)	Time to liquidate: 0-3 days 3+ days	Percentage of Fund: 100% 0%
The maturity profile of the Fund's liabilities: The Fund's material liabilities comprise any amounts payable in respect of the short ASX SPI 200 futures positions.	Maturity: 0-3 days 3+ days	Percentage of Fund: 0% 0% As at 31 December 2019 the Fund had no liabilities in respect of its futures positions.
The Fund's gearing (leverage) ratio:	While the Fund does not borrow for investment purposes, it uses ASX SPI 200 futures to obtain a magnified (or "geared") short exposure. The Responsible Entity anticipates that the Fund's short exposure to the S&P/ASX 200 index will generally vary between 200% and 275% of the Fund's net asset value. As at 31 December 2019, the Fund's short exposure was 224.37% of the Fund's net asset value.	
Derivative counterparties engaged:	As disclosed in the Fund's PDS, the names of the Fund's derivatives counterparties (being clearing brokers which the Fund uses to buy or sell exchange-traded derivatives) are not disclosed in the Fund's periodic reporting to investors, because this information may change from time to time and is considered commercial-in-confidence. The Responsible Entity only deals in ASX exchange-traded derivatives with counterparties which are licensed ASX market participants. The Responsible Entity's criteria for selecting counterparties include that they must have, as a minimum, a long term investment grade credit rating from a major credit ratings agency. The central counterparty for clearing exchange-traded derivatives is ASX Clearing Corporation (or a subsidiary) – this central clearing service is intended to reduce counterparty risk.	

The Fund's investment returns (period ending 31 December 2019)*:	1 year: 5 years: Since inception: (17 April 2015)	-40.78% Not available -16.55%p.a.
Any change in key service providers to the Fund:	No changes.	

*Returns are calculated in Australian dollars using net asset value per unit at the start and end of the specified period and do not reflect brokerage or the bid ask spread that investors incur when buying and selling units on the ASX. Returns are after fund management costs, assume reinvestment of any distributions and do not take into account tax paid as an investor in the Fund. Returns for periods longer than one year are annualised.

Current performance may be higher or lower than the performance shown.

Gearing magnifies gains and losses and may not be a suitable strategy for all investors. Investors in geared strategies should be willing to accept higher levels of investment volatility and potentially large moves (both up and down) in the value of their investment. Investors should seek professional financial advice before investing, and monitor their investment actively. The Fund does not track a published benchmark. Past performance is not an indication of future performance.
